CERTIFICATIONS

Cyber Security Analyst

Cyber Shujaa (USIU-Africa)
2025

Pathway Foundations

ALX Africa
2025

AI Career Essentials

ALX Africa
2025

Virtual Assistant

ALX Africa
2025

TECHNICAL SKILLS

Data Analysis: Microsoft Excel (Advanced - Pivot Tables, VLOOKUP, Data Visualization), Google Sheets, SQL (Basic), Statistical Analysis, Data Cleaning, Reporting, Dashboard Creation

Cyber Security: Risk Assessment, Vulnerability Assessment, Incident Response, Security Monitoring, Threat Analysis, Security Auditing, NIST Framework, ISO 27001 (Familiar)

Quality Assurance: System Testing, Manual Testing, Quality Control, Process Improvement, Root Cause Analysis, Test Documentation, Bug Identification

Software & Tools: Microsoft Office Suite, Google Workspace, SIEM Tools (Training), Log Analysis, Database Management

CORE COMPETENCIES

- Analytical Thinking & Problem Solving
- Attention to Detail
- Technical Documentation
- Communication & Collaboration
- Time Management
- Adaptability & Quick Learning
- Initiative & Self-Direction
- Research & Investigation

PROFESSIONAL SUMMARY

Data analyst and quality assurance professional with proven analytical excellence achieving 93-95% performance across intensive technical certification programs. Demonstrated expertise in data analysis, risk assessment, and systematic evaluation through hands-on projects involving security datasets, quality control, and process optimization. Proficient in Microsoft Excel (Advanced), SQL, data visualization, and security monitoring tools. Skilled in identifying patterns, flagging inconsistencies, and delivering actionable insights through comprehensive technical documentation. Combines strong analytical capabilities with cyber security knowledge and business acumen. Certified in Cyber Security Analysis, AI Career Essentials, and Virtual Assistance. Quick learner with proven ability to master new systems and deliver high-quality results under tight deadlines. Seeking to leverage analytical precision, technical proficiency, and continuous improvement mindset to drive data-driven decision-making in operations, analysis, or technology roles.

PROJECTS & PROFESSIONAL EXPERIENCE

Data Security Analysis Project

December 2025

[Cyber Security Analyst Certification Program - Cyber Shujaa \(USIU-Africa\)](#)

- Analyzed security incident dataset containing 200+ records using Excel and SQL to identify vulnerability patterns and threat trends across enterprise systems
- Applied statistical analysis methods and data visualization techniques to transform raw security data into actionable intelligence
- Conducted systematic risk assessment across 8 information sources using NIST framework methodology to verify threat intelligence accuracy
- Identified 12 critical security patterns including 3 previously undetected attack vectors affecting system integrity and data confidentiality
- Created comprehensive 15-page analytical report with data visualizations (charts, graphs, risk matrices) and executive summary presenting findings to security professionals
- Delivered 8 actionable security recommendations with risk ratings and implementation timelines, adopted by program instructors for curriculum enhancement
- Achieved 93% evaluation score for analytical rigor, data interpretation accuracy, and clarity of technical presentation

Technical Skills Applied: Microsoft Excel (Advanced - Pivot Tables, VLOOKUP, Data Visualization), SQL, Data Analysis, Statistical Methods, Risk Assessment, Security Monitoring, Threat Analysis, NIST Framework, Technical Documentation, Report Writing

Systems Quality Assurance & Vulnerability Assessment

December 2025

[Quality Evaluation & Security Testing Project](#)

- Conducted comprehensive system testing and quality evaluation across 21 technical modules to identify security gaps, operational risks, and quality issues
- Performed systematic vulnerability assessment and documented 18 defects with detailed severity classifications (Critical: 3, High: 7, Medium: 8)
- Applied quality assurance methodologies and root cause analysis to evaluate system architecture and identify potential security exposures
- Developed risk mitigation framework with prioritized remediation roadmap and estimated implementation timelines for addressing critical vulnerabilities
- Created 20-page quality assessment report with visual risk matrices, technical diagrams, process documentation, and executive summary
- Provided actionable recommendations for process improvement, security hardening, and quality control that enhanced system reliability
- Achieved 95% project score for thoroughness, technical accuracy, testing precision, and professional presentation quality

Technical Skills Applied: Manual Testing, System Testing, Quality Assurance, Vulnerability Assessment, Risk Assessment, Root Cause Analysis, Process Improvement, Test Documentation, Technical Writing, Security Auditing

Climate Data Analysis & Environmental Advocacy

2025

[HerdWise Kenya Initiative - Sustainability Project](#)

- Analyzed climate impact data for livestock farming practices across 3 regions using Excel and statistical methods to identify sustainable intervention opportunities
- Created 25-slide presentation deck with advanced data visualizations (charts, graphs, infographics) illustrating correlation between grazing patterns and land degradation
- Conducted comprehensive research synthesis from 15+ academic journals and government environmental reports to support evidence-based advocacy
- Designed 5 professional infographic visuals for social media advocacy campaign reaching 1,200+ stakeholders including farmers and policymakers
- Collaborated cross-functionally with team of 4 to deliver project outputs 2 weeks ahead of schedule while maintaining quality standards
- Applied analytical thinking and data communication skills to translate complex climate data into accessible advocacy materials
- Project materials used by local farmers' cooperative to inform 200+ members about sustainable livestock management practices

Technical Skills Applied: Data Analysis, Microsoft Excel, Statistical Methods, Data Visualization, Research Methods, Presentation Design, Google Workspace, Project Coordination, Technical Communication

EDUCATION & PROFESSIONAL DEVELOPMENT

Cyber Shujaa - USIU-Africa

[Cyber Security Analyst Professional Certificate](#)

2025 | 3-Month Intensive Program | 95% Overall Performance - Top 5% of Cohort

[Powered by USIU-Africa, Serianu Limited & Kenya Bankers Association](#)

- Completed hands-on training in threat detection, vulnerability assessment, risk assessment, and security incident response with practical lab exercises
- Gained practical experience with SIEM tools, log analysis software, penetration testing methodologies, and security frameworks (NIST Cybersecurity Framework, ISO 27001)
- Developed expertise in security monitoring systems, incident documentation procedures, risk reporting protocols, and regulatory compliance standards
- Mastered 21+ technical modules covering systems administration, network security, data analysis techniques, investigation methods, and security operations center (SOC) procedures
- Capstone Project: Conducted comprehensive security audit identifying 18 vulnerabilities (3 Critical, 7 High, 8 Medium) across simulated enterprise environment with prioritized remediation plan and implementation timeline
- Program recognized by major employers including banks, telecommunications, and cybersecurity firms across Kenya

ALX Africa

[Professional Development Programs - Multiple Certifications](#)

2025 | Four Professional Courses Completed with 93-95% Performance

- Pathway Foundations:** Business fundamentals, strategic thinking, career development, professional communication, workplace effectiveness
- AI Career Essentials:** Understanding artificial intelligence applications, technology integration in modern workplace, AI-driven decision making
- Virtual Assistant:** Remote work capabilities, digital tools proficiency, administrative excellence, time management, client communication
- Professional Skills Development:** Team collaboration, interpersonal communication, problem-solving frameworks, adaptability training

St. Augustine Ngenia Boys High School

[Kenya Certificate of Secondary Education \(KCSE\)](#)

Graduated 2023

KEY ACHIEVEMENTS

- Top 5% Performance:** Achieved 95% score in Cyber Security Analyst certification program, ranking among highest performers in cohort of 60+ students
- Perfect Project Execution:** Delivered 100% of project deliverables (3 major analytical assessments) ahead of schedule with zero errors or revisions required
- Multi-Disciplinary Excellence:** Earned 4 professional certifications across technology, cyber security, business, and operations within single calendar year (2025)
- Real-World Impact:** Developed security risk assessment framework and quality evaluation methodology adopted by training program for curriculum enhancement
- Rapid Technical Mastery:** Completed 21+ technical modules covering systems operations, data analysis, security monitoring, and quality assurance in intensive 3-month program
- Analytical Precision:** Maintained 93-95% accuracy rate across all technical assessments and analytical projects, demonstrating consistent attention to detail and quality
- Data-Driven Results:** Analyzed 200+ security incident records, identified 12 critical patterns, and delivered actionable recommendations that improved threat detection
- Quality Champion:** Identified and documented 18 system vulnerabilities with detailed remediation plans, preventing potential security breaches and operational failures
